The Language of Light is vibration, shape and colour – also Consciousness and Being.

Consciousness creates the Being. A retrieval of lost consciousness, which is the Language of Light, will bring forth humans Ascension.

With every karma caused, a tone from the language of light was corrupted or lost completely – hence the human became less, because of the loss.

With every karma cleared, a tone will be reinstated, either part of, or the entire tone. This is through a swapping out of dark/disresonant energy (karma) by the Elementals. Returning that which belongs to another, and re-instating a pure Language of Light tone.

As the initiate does this Language of Light inquiry with each karma cleared, a deeper understanding happens, on the intrinsic nature of consciousness. What is consciousness, and how one loses consciousness and then Being.

When a tone is retrieved in full (it may take a few karmas), then the individual has ‘embodied’ this tone. It is the embodiment of a tone, that the individual then starts to live it, Be it, because the vibration is now complete. It is also through the embodiment of tones, that one becomes Enlightened, and then starts the Ascension process which transforms the biology to the crystalline which will facilitate the form to make the dimensional shift.

The Language of Light is intrinsically linked to the Ascension Initiations and Ordinations. The retrieval of multi-dimensional consciousness, changing the DNA, through clearing karma. The shift to the 5th dimension, is in this form, in this incarnation. Those who can take direction from the Elemental and Guardian Realms (using the correct Communing method) will be propelled through all karmas, initiations and ordinations.
#1 - FORGIVENESS

Pink
Nature: Active
Forgiveness is the basis of all unity in that all is allowed; yet all is healed. In using the vibration of forgiveness, nothing sticks, and therefore all karma is released. As forgiveness is made a part of the aura, all interactions become a blessing. Forgiveness made manifest is the thousand-petal lotus in the heart of the Bodhisattva that projects joy and compassion upon all.

#2 - STRUCTURE

Lavender
Nature: Passive
Structure is the formation vibration which when applied holds the space for layering other vibrations together for the completion or creation of a thought regardless of the creational level. Much as a cup contains or holds the space for a potential mixing or blending in third dimension, structure provides a similar function in the energetic realms. Another way of perceiving structure is as a template or gridwork through which other vibrations may be woven. Yet another function of structure is to provide a pathway for creation, development or communication.

#3 - POWER

Peach
Nature: Integrative
Power is the vibration that motivates, challenges, embodies and carries to fruition the vibrations that blend with it. By itself, power provides a basis for action, including the drive for expansion and completion through the fundamental integrative nature. As power moves in any direction or all directions simultaneously, that which aligns with power moves with it in radiant wave after radiant wave. Unity-based power is whole unto itself, flowing in nature, always seeking to expand through collaboration, yet totally content to be complete in and of itself.

#4 - COMPASSION

Turquoise

retained. In extending, compassion is action in essence, healing in expression. Unity compassion cares not about perpetration, rather it cares only for collective healing beyond the collapse of structure.

#5 - BREATH OF LIFE
Gold
Nature: Passive
Breath of Life governs or allows for the infusion of animus or that which provides any creation with forward moving, expansion-based intent. #7 - FREEDOM
Golden White
Nature: Active

Whatever supports the drive to freedom remains and is amplified and whatever does not support is pushed or left aside.

#8 - DIVINE UNION
Pale Lavender/White

#9 - UNITY CONSCIOUSNESS

**Silver/White/Pink**

**Nature:** Integrative

Unity Consciousness brings together into wholeness all aspects of awareness within so that each consciousness is known to be an aspect of the whole. Then no separation exists between any consciousness, and communion between all consciousness becomes possible. Unity consciousness does not recognize a boundary as a barrier. Rather, the boundary is a point of differentiation of purpose and is worthy of honor and respect. In this way, unity consciousness blends every aspect of the whole in respect, as all contribute to the completion of the vision.

#10 - NON-CONDITIONAL GOVERNANCE

**Pale Golden White**

**Nature:** Completion

Non-Conditional Governance provides the closure or completion of the first nine tones of creation. This completion is the result of combining all the aspects contained in the first nine tones in the creation of the tenth tone. Through the modulation of its capability, non-conditional governance can blend with and provide direction or purpose for any combination of the first nine tones. Like holding the boundaries for a kaleidoscope, which in rotation is constantly changing while maintaining focus and direction, non-conditional governance allows for unlimited expression within the boundaries of the tone.

#11 - JURISDICTION

**Pink - Lavender**

**Nature:** Active

Jurisdiction is like a boundary in that within jurisdiction describes where an influence may be applied and therefore implies where it may not. Jurisdiction is somewhat like structure in that it allows a layering of alignment in a specific area. Jurisdiction in a sense could be seen as the purpose implicit in every consciousness. To the extent that purposes align, then a structure may be created which has a natural boundary of influence related to aligned purpose.

#12 - HOPE

**Peach - Gold**

**Nature:** Passive

Hope requires a basis in compassion, as hope is a vision beyond what is and is fueled by compassion. Expansion causes one to push their field into areas that one's field had previously not extended into, triggering the necessary lessons that result in ascension.

#79 - UNITY OF ALL SPECIES
Nature: Integrative
Glyphs #45 Underwater Worlds and #46 Unity of All Species unite to become #79 UNITY OF ALL SPECIES

In embodying all fruition modulations, a more complete definition can be sent to the sun, resulting in a manifestation more in alignment with one's thought.

**82. Boundaries - Nature: Passive**
The Symbols 'Forgiveness' and 'Non-conditional Governance' unite to become 'Boundaries'
Boundaries is a synthesis which allows the encompassing of a space without defining the space, thereby remaining fluid as well as contained. Boundaries allow the presence of connected thought without shunning other thought. Boundaries simply does not hold the space for non-connected thought.

**83. Alignment - Nature: Integrative**
The Symbols 'Dream' and 'Community' unite to become 'Alignment'
Alignment allows direction and purpose a presence in any creation. mechanical way.

84. Direct - *Nature: Active*
The Symbols 'Action' and 'Communication' unite to become 'Direct'
Direct is purposeful as vision made manifest through action in a direction. Direct provides motion and power to empower a creational act into manifestation and sustain the manifestation in a state of evolution. Any creation requires a constant infusion of Direct to maintain action or motion in a direction and in alignment with a vision or thought. As each modulation of Direct is embodied, the ability to more finely tune a creation into alignment with the creational thought becomes possible.

85. Creation - *Nature: Passive*
The Symbols 'Unseen Worlds' and 'Unspoken Worlds' unite to become 'Creation'
Creation provides the milieu for the projection of thought to manifest as a distinct form, formation, or formulation in relation to all other possible thoughts. Creation contains the possibility for expression of all possible thought even in relation to each thought. Creation connects thought whose purpose or consciousness requires the inter-connection for the evolution of all thought and in the connection creates that which may have never before existed.

86. Universe - *Nature: Integrative*
The Symbols 'Unspoken Worlds' and 'God Goddess All That Is' unite to become 'Universe'

87. Production - *Nature: Active*
The Symbols 'Dance of Life' and 'Unseen Worlds' unite to become 'Production'
Production animates and individualizes possibility through flow or movement in a direction as the stream brings life and definition to that which it touches. The invoking or applying of Production in the creative act provides for a more complex creation whose existence allows for the existence of other creations. The inter-relation allows for one creation to be at least partially defined in relation to another creation. The accumulated inter-related group then takes on an existence and evolution all of its own.
88. Cast of Characters - Nature: Passive

The Symbols 'Community' and 'Human Species' unite to become 'Cast of Characters'

Cast of Characters allows for the blending of individualized possibility; underlying, anchoring, and providing for the creational learning experience possibilities. Cast of Characters provides the inter-connection whereby large creational possibilities can be rooted or characterized by small inter-relations of which the whole is much greater than the summation of the individualized pieces and parts. Cast of Characters allows for expanded possibility. The actual expansion is a function of the conscious desire of components to evolve.

89. Civilization - Nature: Integrative

The Symbols 'Land Based Worlds' and 'Human Species' unite to become 'Civilization'

Civilization organizes components of thought into a distinct experiential blending or creation, which fulfills upon the fullness of possibility inherent in the components. The integrative or organizational nature of this tone when applied to the components of a creation imbes the creation with a consciousness in collaboration with each of the components, which is simultaneously contributed to and enhanced by each of the component consciousness. This type of consciousness can only be whole while a balanced giving and receiving is expressed by each component. Anything less and the whole begins to fracture.

93. Other Universes - Nature: Integrative
The Symbols 'External' and 'God Goddess' unite to become 'Other Universes'
Other Universes creates an expanding wholeness for the continued movement of expression much as a moving, faceted, mirrored ball allows the display of many angles of reflected light. Other Universes creates expansion viewing itself from the inside and acknowledges growth and evolution viewing itself from the outside. As the expansion moves towards completion, the facets loose their definition back into the whole.

94. All That Is - Nature: Active
The Symbols 'Oneness' and 'God Goddess' unite to become 'All That Is'

95. Infinite - Nature: Passive
The Symbols 'God Goddess' and 'God Goddess' unite to become 'Infinite'
Infinite allows the combination of possibility to create that which would not otherwise be. This form of linking brings forth the unknown. This expression of God Goddess uses the fullness of the thought of God Goddess to create the internal combinations that are only possible after the other possibilities have come to completion and yet a lack of wholeness is experienced. The links to bring forth the unknown require balance. Anything less will cause a spin into distortion.

96. Infinite Magnitude - Nature: Major Completion
The Symbols 'God Goddess', 'God Goddess' and 'Magnitude' unite to become 'Infinite Magnitude'
Infinite Magnitude, as a major completion tone, combines that which came before to orchestrate creation as an ongoing expansive endeavor of creational possibility made manifest. This level of

**Tri-tones**

97. **Infinite Oneness**  
*Twice God/Goddess and Oneness*  
Infinite Oneness allows forever or expansiveness to experience the moment. The application of infinite oneness expands the moment into the opportunity of all possible expressions. The movement from all possibility to a moment expression is action directed from a point of balance.

98. **Symbolic**  
*Balance, Dream and Communication*  
Symbolic allows for moment to moment coherence. The translation of any possibility requires the interweaving of all the possible moments perhaps viewed as links or chains of experience, each moment leading to many possible moments. Each possible experience contains within itself all the expressions that are woven so as to maintain balance in creation. Symbolic in the passive weaving is the predisposition for completion.

99. **Inspiration**  
*Passion, Creativity and Purpose*  
Inspiration combines a moment movement within a structure to allow fulfillment of the moment. Each creational moment emboldens the next moment to a more expansive mode of expression. The pathway from the possible to the complete is directed through creative self-expression.

101. Collaborative Dream

*Dream, Community and Function*

Collaborative Dream allows for structure within which creative self-expression can actualize. Each potential moment of self-expression longs for a context of fulfillment, each moment being defined by the context. 102. Collaborative Structure

*Community, Structure and Human Species*

Collaborative Structure integrates movement and the attraction to come forth into the experience of the moment. Each expansion of the moment widens the known, the actualized, and thereby widens the potential, the possibility.

103. Collaborative Creations

*Dance of Life, Fluidity and Divine Union*

Collaborative Creations allows the push toward the greater moment. This allows the moments to align with intent such that all moments contribute in harmony.

105. Collaborative Governance  
**Un-Conditional Governance, Stealth and Communication**  
Collaborative Governance integrates momentum and design from the moment into the moment. All possibilities are accounted for and provided the opportunity to express through the moment. Fullness and completeness are implicit for all expression is equally important. The opportunity to express is provided equally, fully and completely until completion is expressed and the moment is complete. Each completed moment gives up its essence into the greater moment driving toward greater completion.

106. Consensus Reality  
**Communion, Jurisdiction and Power**  
Consensus Reality is a completion tone that combines the capabilities of all previous nine tones. This tone allows the segmenting and combination of moments so larger explorations can be expressed. 117. Evolutionary Plan of All Species
Dream, Purpose and Communication
Evolutionary Plan of All Species allows movement forward through multiple planes of access in the unfolding expression of self becoming. Each possibility extends itself seeking other extensions of self becoming to cooperate and interact with. Each movement forward by various expressions of self causes other expressions to move forward as well, each drawing the other to bring out that which has remained unexpressed.

118. Divine Timing of All Species
Breath of Life, Function and Balance
Divine Timing of All Species defines the space of expression within which the extensions of self becoming may unfold. Creation requires a space of cocooning and nestling lest outward movement cause separation and singularity. Divine Timing in the synchronization of expression sets the stage for consensus level cooperation by aligning motion into common grouping for common purpose whereby all participating gain through the self-expression of the whole.

119. Divine Dance of All Species
Stealth, Structure and Dance of Life
Divine Dance of All Species integrates the movement of Evolutionary Plan within the possibility of Divine Timing to allow the weaving of the design to unfold into the larger design available within the consensus. Each extension toward completion within the Divine Dance provides the opening for larger weaving and greater completion and is this not the potential in evolution that each moment defines itself and opens into the next moment.
120. Multidimensional Awareness
Intuition, Consciousness and External
Multi-Dimensional Awareness allows movement beyond self and consensus to forge cooperative universal activity taking the greater good of all into a wider arena of expression. Each opening for construction past oneself is the possibility linking all structures into one larger and more expressive than the last.

126. Awareness of All That Is

Consciousness, God/Goddess All That Is and Oneness
